

Rechnen mit Bildern/ Übungsblatt 20

Ziehe die Autos voneinander ab und schreibe die richtigen Zahlen in die richtigen Kästchen!

Lösungen:

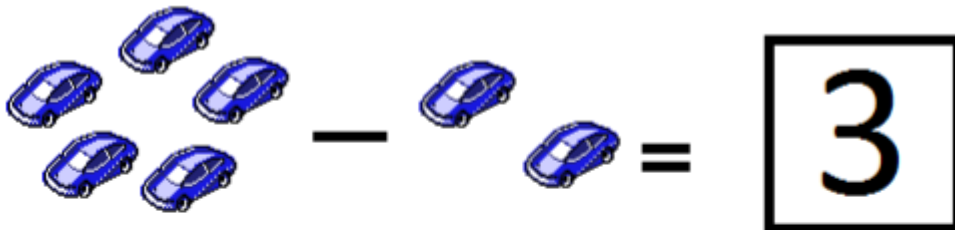

A visual subtraction problem. On the left, there are four red cars arranged in a 2x2 grid. A minus sign is placed to the right of the grid. To the right of the minus sign are two red cars arranged vertically. An equals sign follows, and to its right is a square box containing the number 2.

$$4 - 2 = 2$$

A visual subtraction problem. On the left, there are two yellow convertibles arranged vertically. A minus sign is placed to the right of the pair. To the right of the minus sign is one yellow convertible. An equals sign follows, and to its right is a square box containing the number 1.

$$2 - 1 = 1$$

A visual subtraction problem. On the left, there are five blue cars arranged in a pentagonal pattern. A minus sign is placed to the right of the group. To the right of the minus sign are two blue cars arranged vertically. An equals sign follows, and to its right is a square box containing the number 3.

$$5 - 2 = 3$$

A visual subtraction problem. On the left, there are four red cars arranged in a 2x2 grid. A minus sign is placed to the right of the grid. To the right of the minus sign are three red cars arranged in a horizontal row. An equals sign follows, and to its right is a square box containing the number 1.

$$4 - 3 = 1$$
